**Madison Woods : A DIY Ginseng Habitat Site Assessment Guide: Companion Plants** before purchasing it in order to gage whether or not it would be worth my time, and all praised A DIY Ginseng Habitat Site Assessment Guide: Companion Plants:

2 of 2 people found the following review helpful. Helpful but Could be betterBy FlgThe book is very short as intended. It would be even better with pictures of trees and bushes that often accompany ginseng. Not that many are listed in the book so it wouldn't take a lot to add pictures. It would also be helpful if more captions were used. What time of year were pictures of the different plants taken? When do seeds or flowers on the respective plants appear? What does a plant look like in the spring, summer and fall? This would allow readers to get use out of the book during the entire growing season, not just a one season snapshot. More photos and description of ginseng throughout the growing season would also be useful. All in all book is pretty basic and would be more valuable with more plant and

environment descriptions and photos. Doesn't really contain much more information than what you can find for free on the internet. 4 of 4 people found the following review helpful. Good "Start Here" book! By Witchy This book was a valuable read for me. This is not a "How To" book. This is a brass tax primer on site assessment. If you are thinking about cultivating ginseng (growing, "wild simulated") on your ground this will tell you if you are wasting your time, or if you have a suitable growing climate potentially saving you hundreds or thousands of dollars and time. Great read, easy and straightforward. 1 of 1 people found the following review helpful. Five Stars By Patrice I was happy on the how informative this book is. And he allows for a followup.

Knowing Ginseng Companion Plants make finding Ginseng Habitat Easier! Short and straight to the point. Find the best place to grow or look for ginseng and ginseng companion plants with this do-it-yourself ginseng habitat assessment guide from Wild Ozark.
