Trevor Manning : Microwave Radio Transmission Design Guide (Artech House Microwave Library) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Microwave Radio Transmission Design Guide (Artech House Microwave Library):

This newly revised edition of the classic Artech House book, "Microwave Radio Transmission Design", provides a current, comprehensive treatment of the subject with a focus on applying practical knowledge to real-world networks. The second edition includes a wealth of important updates, including discussions on capacity limitations, ethernet over radio, and details on the latest cellular radio standards (2.5G, 3G, and 4G). Professionals also learn about recent changes in spectrum management and find more details on the fundamentals of antennas, especially at VHF/UHF levels. This practical book offers proven advice that helps save engineers time and money when developing new networks, and reduces the risk of encountering problems during design and planning.

About the Author Trevor Manning is a director at TMC Global in Northampton, Northants, UK. He holds a B.Sc. in electronics engineering from Natal (Durban) University in South Africa.
