Easy step by step ways to create your very own natural laundry detergent. Valuable information about our health concerns relating to chemicals in store bought detergent. Easy to read, follow directions, and execute. Total eye opener. Very good reading for anyone with health issues, little children or just concerned about the things that matter.

Lots of great information. There were not very many detergent recipes. Could have been vastly improved with some pictures... making the soap, presentation in containers for gifts or to sell, etc. Pictures to illustrate some of the things you discuss.

I have made my own Natural Laundry Detergent for sometime now. I started doing it to save money when times were tough. I have gone back and forth between making my own and commercial brands. After reading this book I will never be distracted by my own laziness again and purchase commercial brands. Not only does Natural Laundry Soap do an excellent job the benefits are superior. I didn't really know how much until I read this book.

They are not the only people who got the chance to play with the detergents. Starting from the Italians and Egyptians, every culture has used many methods of washing clothes. This book does not take you to the history of how each culture washed their dirty clothes. This book talks about the dirty side of the chemical detergent. Starting from the mild skin irritation to cancer, the list of health concerns are quite prolonged. Are you someone who checks out the dolphin-safe label on the tuna can before you buy? You must be doing it for your detergents too. The chemicals used in the detergents might not be as good for us as they show in those fancy advertisements. This book is not a weeny part to worry about the problems. There is a conclusion to this problem, which is going back to using the natural products, as a detergent. In a practical tone, it is very much possible, reliable and easy to make and use. This book gives you the recipes, the directions for using the ingredients, how to market them and last but not the least, what to and what not to expect from a natural laundry detergent. Just because you turn to natural product, it does not mean that all the problems will be solved, but according to a statistic, if every person in the USA say no to petrochemical products, once a year, 140,000 gallons and more of the fuel will be saved. So, even if you change, it would have an significant impact on the environment and most importantly, on your health.
