I have no art training. I thought it would be nice to embroidery some of my sketches and as I searched on the Internet, I discovered this book. Exactly what I was thinking. I embroidered some as a teenager so had some experience with a few stitches. This book is great for a beginner. I have started out with the practice motifs first. So glad I did. Unlike knitting needles, these needles numbers are 1 for largest, 10 for smallest. I also forgot about the fabric grain needs to be correct when you put your hoop on. My first try, was puckered! The book has great instruction and I have been looking at some videos on the Internet regarding the "starting and ending off". I had always used a knot. So glad I know how to do this properly now. I also searched the Internet for storage ideas and found some good ones. (Floss-Away Bags). I also went back to craft store to get a magnifying light. The first small one I bought, OttLite, was too small, missing instructions and no light? Took it back and just got a magnifying light that hangs from my neck. It actually works good. Had 60 % off coupon. So will use this for now but will keep looking around for a better one later. It really speeds things up to see better! I can see this is very time consuming. Hopefully, I will get faster. I like to get results quickly and I can see, doing a bird is going to take lots of work and time, but I am enjoying it. Suppose that is the point anyway. Love this technique. I hope I will eventually get mine to look like the authors. Absolutely beautiful work in this book. May 20, 2016. Sketched, (juvenile marsh wren) did color pencil and then made a guide for needle painting. Need to practice, but I think I learned a bit through this project. 3/5/2017. Completed my second bird pillow and starting a third.1 of 1 people found the following review helpful. Five StarsBy frances b raygreat stitching book. Just from the front cover you can see how good this book is for anyone who wants to create embroidered flowers or birds. I have long admired Trish Burr and her books. Subtitled 'Fresh Ideas for Beginners', this book encompasses work that would satisfy embroiderers of any level. There is a detailed introduction to long and short stitch with step by step instructions enhanced with appropriate photos. Trish really does use her needle like a paintbrush. The projects are wonderful and there are ideas on how to use your finished embroidery. This a lovely book for any embroiderer.- KarenPlatt.co.ukAbout the AuthorTrish Burr is the author of the highly successful and beautiful books Redoute's Finest Flowers in Embroidery (2002), Long and Short Stitch Embroidery: A Collection of Flowers (2006), and Crewel Surface Embroidery-Inspirational Floral Designs (2008), all published by Sally Milner Publishing.
