**Ernie Dieringer : White Ironstone China: Plate Identification Guide 1840-1890 (Schiffer Book for Collectors)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised White Ironstone China: Plate Identification Guide 1840-1890 (Schiffer Book for Collectors):

0 of 0 people found the following review helpful. Five Stars By bagood reference book 0 of 0 people found the following review helpful. Great book! By Jane M. Diemer My friends, Ernie and Bev Dieringer, did a fantastic job with this book, using small and large collections to enable their readers to see patterns plainly. Every white ironstone enthusiast should own this one.

The identification of English white ironstone plates is made far easier through this new book. Organized according to the shape names, the 327 color photographs and 252 drawings of plates, rims, potters' marks and registry marks are

easy to compare. Copper Lustre and Tea Leaf decorations are included. Because few written records from the manufacturers are available to help analyze these plates, made in large quantities for export primarily to the United States between about 1840 and 1890, this study will be an important reference for identification and comparisons. It is both comprehensive and easy to use, providing an important tool for collectors, dealers, curators, designers, auctioneers, and historians for analyzing Victorian cultural history.
